Dear Mrs. Manley,

Thanks for your nice letter.

The transcript of the CBS show may still be available from CBS News, New York, N.Y. That reaches the,

You will find that Thompson's representation of LIFE and the Zapruder film is carefully tailored to make things that are not true look like they are:

That he did original work on it;
That Life "released" it;
That he "discovered" new things it it. He didn't. He stole them, from me for the most part but also from a man named Marcus.

The only other information I can pass along, is in my four published books, of which I enclose a list.

Sincerely,

Harold Weisberg
